## SYMPOSIUM – Day 1

13<sup>TH</sup> December 2025

### PLENARY LECTURE:

- Inflammation and CNS Tumor Genesis
- Maintaining Professionalism in Clinical Neurology Practice in the Modern Era

### STROKE

- Bridging Neuroscience and Recovery: Advances in Stroke Rehabilitation
- PFO and Paradoxical Embolism: What Every Neurologist Should Know
- Neuroprotector and Metabolic Regulator in Cerebral Ischemia: A New Therapeutic Approach

### NEUROONCOLOGY

- Treatment of Hypercoagulability State in Brain Tumor Patient
- Surgical Challenges and Advances in Resection of Highly Vascular Brain Tumors
- Consideration of Preoperative Embolization in Brain Tumor

### NEUROINTERVENTION

- Mechanical Thrombectomy: From “Time is Brain” to “Time is Tissue”
- Imaging Beyond the Clock: Selecting the Right Patient for Mechanical Thrombectomy
- When the Device Fails: Understanding and Managing Unsuccessful Thrombectomy

### EPILEPSY

- Post Stroke Epilepsy: Clinical Challenges and Management Strategies
- Perioperative Management of Epilepsy in Neurooncology: Preventing and managing Post-Operative Seizure
- Autoimmune and Paraneoplastic Epilepsy

## SYMPOSIUM – Day 2

14<sup>TH</sup> December 2025

### PAIN AND HEADACHE

- Abortive Migraine Therapy: Revisiting the Role of Serotonin with Ergotamine and Triptans
- Nociceptive vs Neuropathic in Chronic Pain: History, Evolution, and Best Practice Guidelines
- Cancer Pain: The Proposed Role of Central Sensitization

### BEHAVIOUR AND SLEEP DISORDER

- Bridging Stroke Care and Cognitive Health: A Holistic Approach to Vascular Dementia
- Preservation of Neurocognitive Function In The Treatment of Brain Metastasis
- Sleep architecture and clinical sleep symptom in cerebral tumor patient and pharmacological choice for treatment

### MOVEMENT DISORDER AND PERIPHERAL NERVE

- Optimizing Parkinson's Disease Management: Current Evidence and Future Directions
- A Comprehensive Neurorestoration Framework for Vascular Parkinsonism
